

## INTEGRATED BUDGET INFORMATION SYSTEM (IBIS) Release 2.4.4 Notes - October 7, 2013

### Issues Fixed or Enhancements Made:

#### Operating Budget Revision

- Corrected issue with connecting to reciprocal budget revisions in the transfer to/from section
- Corrected form to ensure agency remarks do not display on forms submitted to OSBM
- Corrected miscalculated FTE summary total on PDF
- Corrected DOT-specific issue where general fund codes were showing 'change in fund balance' instead of 'appropriation'
- Corrected issue where a close button did not always show on a "ready to submit" form
- Corrected Excel upload so that it supports "0" dollar entries
- Changed the approval date to default to the current date (rather than the submitted date) for type 11/12 revisions (the approval date can still be modified manually if necessary – i.e. backdated)

#### Capital Budget Revision

- Corrected issue where duplicative revision numbers were being created
- Corrected issue of PDF showing the incorrect status of a request
- Corrected issue of dropping the approval date for internal revisions
- Corrected issue of the PDF showing the formula for 'change in fund balance' instead of for 'appropriation'

#### Budget Code and Fund Code

- Added budget code to the read-only budget code request form
- Required approval date for OSBM approval of a budget code request
- Added fund code request number to the PDF

#### Capital Allotment

- Added ability to enter commas on dollar amount data entry fields
- Added cents to requirement table
- Added rule that internal requests may not have an increase or decrease in requirements or receipts
- Added display of cents to summary lines
- Added allotment number on form for approved internal allotments

## General

- Changed the “updated by” field in work queue to change only when forms have been edited rather than simply opened/reviewed
