

INTEGRATED BUDGET INFORMATION SYSTEM (IBIS) Release 2.5.5 Notes – November 20, 2013

ISSUES FIXED

- Corrected the issue of generating an incorrect PDF for budget revisions
- Corrected the issue of duplicate budget revisions appearing in the system
- Ensured that the 2013-14 authorized budget appears on the budget revision form's budget detail and budget overview tabs
- Addressed several Journal Entries issues, including complications with linking budget revision sets and showing deleted revisions in sets (OSBM function only)

ENHANCEMENTS

- Changed rules in the transfer of appropriation section of the budget revision form to prevent unauthorized transfers of appropriations
- Added multiple capital budget codes as "statewide"
- Added timestamp for action to the PDF of the budget revision form
- Assigned common sense naming scheme to Journal Entry sets (OSBM function only)
- Added message to Salary Control to notify users about enforcement of security measures if the user is not authorized to view detailed transactions
- Remove spellchecker from the system (spelling can be checked through internet browsers and other means)
